## **Thank you for purchasing the Cineroid.**

---

The Cineroid CFL LED Light is high quality RGBW soft light with portable size. Light weight and thin panel makes easy to use and getting around any type, environment. Please thoroughly read the user manual for best operation and understanding of all of the functions of the Cineroid LED light.

### **| Test Before Operating**

It is recommended to test the device before operating. Check if the LED Light can be turned on once powered, and check if the information/menu is being properly displayed on the LCD.

## Safety Precautions

Please observe the following safety precautions as they are meant for the safe and proper use of the product to reduce the risk of accidents. Upon reading the user manual, keep it in a safe and available place.

- ⦿ Do not use any batteries, power cord, or accessories that are not specified in this document.  
when your hands are wet. When unplugging the power cord, grasp the plug body or adapter instead of the cord.
- ⦿ Power cords that are scratched, heavily bent or twisted can potentially be hazardous and a source of electric shock and/or fire.
- ⦿ Do not insert foreign objects into the product's electric or cable components.
- ⦿ Do not place the power cord near sources of heat as this may melt or cause damage to the cord potentially causing fire or electric shock.
- ⦿ Do not disassemble or modify the product. This may damage the product and cause danger due to a malfunction.
- ⦿ Please keep the product out of reach of young children. Injuries may occur due to damage to the product.
- ⦿ When using the product in an airplane or hospital setting, it is recommended to acquire authorization first as signals or electro-magnetic waves from the product may cause other equipment to malfunction.
- ⦿ Do not store the product in a dusty or humid environment as damage may occur.
- ⦿ When the product is mounted on a camera, do not lift or move the camera by grabbing the product. This may cause damage to the product or the camera mount.
- ⦿ Do not clean the product with paint thinner, benzene, or other volatile solvents. This may cause damage to the product and become a fire hazard.
- ⦿ This product is not waterproof. If the product is dropped in water, contact the service center immediately.

## Name of each part

## LED Panel with Bracket

## Set LED Panel on the Bracket

To combine the LED panel with the bracket, rotate the 4 screws of the bracket by pressing and screwing them together.

## Name of each part

## Ballast

## Before Using

## Before Using

### 1 Connect LED Panel to the Ballast

Connect the LED panel and ballast connectors.  
And then screw the nut to tight. It can be used  
extension cable between connectors.(optional)

### 2 Input the Power by DC

Connect the LED panel and ballast connectors.  
And then screw the nut to tight.

## Before Using

### 3 Input the Power by Battery (CL-DV/CL-DG)

Insert the correct type battery to the battery port.

Turn on the power button to check the LCD.

When removing the battery, press the detach latch and remove the battery in reverse order of mounting.

### 4 Power On / Off

Press the button to turn on the controller.

The CINEROID logo appears briefly on the controller screen.

## Before Using

### 5 USB Output

Ballast can be used in a 5V, 1A USB output. Connect the power to the controller and use it with the switch turned on.

### 6 D-Tap Output (CL-DV/CL-DG)

CL-DV or CL-DG Ballast can be used D-tap output. After attaching the battery to the battery mount, turn on the power and use the D-tap cable. (D-tap cable not included)

## Before Using

### 7 Charging the Battery

V or G Battery can be charged on the ballast through DC power. Install the battery to the ballast, turn off the power switch while DC power is connected, and turn on the Charging switch.

When the battery is charging, the charging icon is displayed in red on the screen and it is displayed in green when charging is complete.

Charging

Charging Complete

## Before Using

### 8 Set the Soft Box

Install the Soft Box Body first. Open Soft Box Body and attach it to the Velcro on the back of the LED panel. After installing the Soft Box Body, cover the Soft Diffuser to the Velcro outside Soft Box Body.

## Operating
